

КАТАЛОГ КОНТУРНЫХ ВИТРАЖЕЙ  
шкафы купе, перегородки, входные группы

*Витражи*

2015 г.

## ВИТРАЖИ В ШКАФЫ-КУПЕ, ПЕРЕГОРОДКИ, ВХОДНЫЕ ГРУППЫ

**Контурные витражи** - одна из современных популярных техник эксклюзивного декорирования стеклянных и зеркальных поверхностей. Многие дизайнеры во всем мире останавливают свое внимание на витражах, как на эффективном средстве для создания элитного декора. Они придают помещению особый шарм, создают удивительную романтическую атмосферу, позволяют создавать неповторимый стиль и уют. Контурные витражи актуальны как для жилых домов, так и для общественных зданий: ими украшают холлы, кабинеты, залы ресторанов, кафе, клубов, выставочных центров.

Свое название они получили благодаря технике их изготовления, в соответствии с которой на поверхность стекла наносится контур узора - после застывания контура (обычно для этого требуются сутки), участки, образовавшиеся в результате его нанесения, заливаются специальными полимерными лаками и цветными эмалями. Поэтому контурные витражи еще называют заливными.

Изготовление таких витражей осуществляется вручную, что дает возможность получить на поверхности как точкий и бледный, так и насыщенный цвет. Достоинство контурного витража – эффектный внешний вид, индивидуальность изделия, возможность воплотить самые неожиданные замыслы.

Изготовление витражей не предусматривает применение вредных веществ, поэтому изделия являются абсолютно экологически чистыми. Контурные витражи имеют качественный стойкий к различным воздействиям рисунок, так как в процессе изготовления используются высококачественные полимерные материалы и эмали. Такие витражи могут использоваться практически в любых помещениях.

Для создания рисунков для контурных витражей применяют прозрачные и непрозрачные контуры и глянцевые лаки. Ширина контура равна примерно 2-2,5мм, его высота равна - 1,5-2мм. Эти рисунки отличаются долговечностью и насыщенностью цветов. Принято считать существенными лишь два ограничения по сложности при исполнении рисунков в этой технологии. Нежелательно заливать слишком большие участки – не более 30см. Или участок заливки может быть длиннее, но уже. Также мелкие детали желательно не рисовать, т.к. контур может слипнуться, и рисунок получится слишком насыщенный.

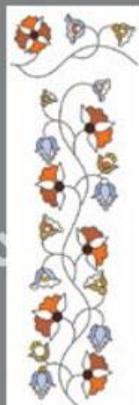

Область применения контурных витражей достаточно широка: потолки, ниши, шкафы купе, двери, кухонные фасады. Очень эффектно выглядит мебель с витражными вставками. Контурными витражами можно осуществлять зонирование в помещении.

Контурный витраж – это прекрасное подтверждение хорошего вкуса и благополучия, он всегда будет привлекать внимание Ваших гостей.
